

ADAOER AUTO PARTS CO.,LTD. is a modern enterprise integrating R&D, production, sales and service, boasting first-class equipment and advanced technology. Its products not only meet domestic demand but are mostly exported to the Americas, Europe, the Middle East, Southeast Asia and beyond.

A professional filter manufacturer renowned for car filters, the company has mastered advanced manufacturing technologies and experience in the domestic filter industry over the years. It now operates over a dozen production lines, covering oil, fuel, air and cabin air filters across more than 10 series and 2,000 varieties.

With a sound management system and flexible operations, it ranks among the pioneers in North China's industry. Amid market evolution, the company enhances competitiveness through professional, scientific management. Upholding the philosophy "Ingenuity in craft, care in products," it has earned users' trust with years of experience, reputation and sincere service. Backed by strict quality management and a spirit of continuous improvement, it remains committed to delivering superior services.

PASSENGER CAR OIL FILTER

Passenger Car Oil Filter/Fuel Filter

OIL FILTER

- 1. Filter paper: ADAOER, filtration efficiency, filtration precision.
- 2. Center Tube: Thickened galvanized, support strength, pressure resistance.
- 3. Shell: 56D steel, stable structure, pressure resistance.
- 4. Rubber ring: High-quality rubber O-ring, high-temperature resistance, corrosion resistance, sealing, -40° to 120°.
- 5. Check valve: Large area, high toughness, corrosion resistance.
- 6. Bypass valve: Moderate pressure value, engine protection.

FUEL FILTER

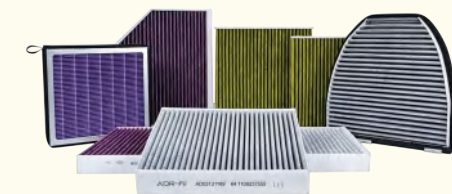

- 1. Nylon Cover:
Properties: Wear-resistant, high toughness, chemical stability, odorless.
- 2. AMS Special Fuel Paper:
Performance: Higher filtration efficiency and precision.
- 3. Nitrile Butadiene Rubber Ring:
Durability: Temperature-tolerant, anti-aging, corrosion-resistant, long service life.

Passenger Car Cabin Air Filter

Coconut Activated Carbon + Zinc Ion Tech

- 1. Surface: Electrostatic cotton — captures airborne impurities in 30 sec
- 2. Core: Premium coconut shell activated carbon
- 3. Antibacterial Layer: 99.95% filtration of E. coli, S. aureus, etc.
- 4. Advantages: Low resistance, high dust capacity, >95% PM2.5 filtration, 97.7% gas adsorption (odors/formaldehyde)

Passenger Car Air Filter

- 1. Air Filter Paper: High-efficiency filter paper, low initial resistance, large filtration area, long service life.
- 2. PU Material: High toughness, good sealing performance, not easy to age and harden.
- 3. PP Material: Heat-resistant (up to 130°C or higher), high strength.
