COMPANY PROFILE

ADAOER AUTO PARTS CO.,LTD. is a modern enterprise integrating R&D, production, sales and service, and we have first-class production equipment and advanced technology. The products not only meet domestic needs, but most are exported to the Americas, Europe, the Middle East, Southeast Asia and other regions. Over the years, the enterprise has always firmly grasped the domestic filter industry, advanced manufacturing technology and experience, and gradually developed into a well-known professional filter manufacturer focusing on car filters at home and abroad.

Now the company has more than a dozen filter production lines, and the products cover oil filters, fuel filters, air filters, cabin air filters, with more than ten series and two thousand varieties.

We have a complete management system and flexible mode of operation, and have become one of the pioneers in the same industry in Northern China. With market development and transformation, the company is utilizing professional and scientific management methods to enhance its overall competitiveness. With many years of marketing experience, reputation and sincere service, we have won the praise of the majority of users. We will stick to the original intention of "Things come from ingenuity and products come from care", relying on a strict quality management system and the spirit of continuous improvement to provide users with higher quality services.

CORE ADVANTAGES

HIGH-QUALITY MATERIALS

LEADING TECHNOLOGY

STRICT TOLERANCES

PRODUCTION CAPACITY

QUALITY ADVANTAGE

PRODUCT EXPLODED VIEW

- **PLASTIC PARTS**
 1. Long-service life
 2. Finely processed with high-quality particles
 3. No recycled materials
- **SHELL**
 1. Made of genuine 56D steel coil material
 2. Integral stamping
 3. Strong and not easy to deform
 4. Not easy to rust and crack
- **FILTER PAPER**
 1. High temperature composite paper
 2. Long service life with excellent filtration of water and oil separation
 3. Widely applicable to various mechanical equipment
- **STEEL PLATE**
 1. High-quality thickened steel plates
 2. Stamped with high precision
 3. Not easy to rust when placing for a long time
- **Rubber Sealing Ring**
 1. Oil-resistant
 2. High-temperature resistant
 3. Corrosion-resistant
 4. With good resilience and sealing properties
 5. Working temperature: -40°C to 130°C

OIL/FUEL FILTER

- 1. Filter paper: Use ADAOER special filter paper. Higher filtration efficiency and higher filtration precision.
- 2. Centre tube: Exclusive Sealing Ring, using thickened tin-plated centre tube to ensure stronger support and pressure resistance. And the tin has high stability.
- 3. Shell: Adopting real 56D steel to ensure the initial stable structure of the steel plate and the pressure resistance of the shell.
- 4. Process: Unique ultrasonic welding process to ensure 100% sealing of the filter paper.
- 5. Rubber Sealing Ring: Special high quality rubber Sealing Ring, more resistant to high temperature and corrosion. Provides good sealing at temperatures from -40° to 120°.

Durable long life

auto parts

AIR DRYER

- 1.Molecular Particles: ADAOER air dryer adopts unique 4A grade Molecular Particles, which can completely remove moisture and oil from the air of the brake system, thus ensuring clean and dry air in the ducts.
- 2.Shell: Made of 0.8mm 56D steel real coil, without deformation and stretching process, to ensure the stability of the steel structure.The shell is stronger and more resistant to pressure.
- 3. Cover Plate: It is consisted of 4.5 or 6 mm cover plate and 1 mm thick seal plate. The surface is galvanized to prevent corrosion and rust.
- 4.Rubber Sealing Ring: Special high quality rubber Sealing Ring, oil-resistant, high temperature-resistant and corrosion-resistant. This can ensure that the rubber ring has good elasticity and sealing at working temperatures from -40℃ to 130℃.
- 5.Pressure value: 14 bar.
- 6.Weight: 2.2 kg or more.

AIR FILTER

- 1.Made of F7 paper, it has high air permeability, large air intake, waterproof and moisture-proof, and saves fuel consumption.
- 2.Polyurethane: Made of high-quality polyurethane, it has high tensile strength, good elasticity, and high temperature resistance (not easy to crack in high temperature areas), which ensures good sealing and extends the service life of the filter element.
- 3.Wire mesh: made of 0.8mm thick high quality steel welded, with good support.
- 4.Cover Plate: Anti-fingerprint material, anti-corrosion and anti-rust.
- 5.The warranty for heavy equipment vehicles depends on the operating conditions, the warranty cannot be expressed exactly but covers the same operating conditions. ADAOER air filters have a longer service life than most air filters on the market.
- 6.Dependent on the model, we use external winding, iron mesh or iron sheet technology to reduce the wear and tear of the filter paper and extend its service life.
